

WHY CHOOSE AN AMBULATORY SURGERY CENTER (ASC) ?

Patients who choose an outpatient surgery center or an ambulatory surgery center have found them to be more cost effective, convenient, safe and patient focused. In an Ambulatory Service Center patients find their visit to be more seamless and personal with specialized staff to assist throughout the process.

Patient Focused:

In the Ambulatory Surgery Center (ASC) all of our procedures are scheduled which ensures our patients procedures are rarely bumped or delayed by emergency cases. ASC's perform a limited number of procedures creating an easy to navigate facility. ASC's know exactly how many patients will be seen each day and are able to staff appropriately allowing further accommodating for our patients.

Convenient:

Our centers offers patient registration, waiting rooms, endoscopy suites and recovery rooms all in one building making it convenient for our patients and their care givers.

Safety:

Patient safety is the utmost priority at our centers. Our facilities are licensed by the state as an ambulatory surgery center and have received recognition by the American Society for Gastrointestinal Endoscopy for Promotion Quality in Endoscopy.

Cost Effective:

Most hospitals have a high overhead due to the wide range of procedures offered. Hospitals also have to be able to perform surgeries for the seriously ill and any emergency cases. Our centers are able to perform your procedure at the same high level of care, but at a lower cost.

Check with insurance provider for further information.
